

A Ouka & Co publication

THE OUKA WORLD Let's save our climate

A book for children by
Carole Stora-Calté

SUMMARY: The OUKAS are creatures that live in a marvellous world. One day they come on holiday to our planet and they notice that everything is going wrong. The countries that should be nice and warm are dry, in the countries that should be cold the ice is melting and in the countries where the weather should be mild, that is not too hot or too cold, there are floods. So the OUKAS try to find a solution to save our planet!

THE AUTHOR: Carole Stora-Calté graduated from Sciences Po, Sorbonne and Mines ParisTech. She is a laureate of the Institut des Hautes Etudes de Défense Nationale, national award. Author of several articles in peer-reviewed journals, she has always been passionate about issues regarding human beings and their environment.

ABSTRACTS OF FOREWORDS AND COMMENTS:

“I believe that environmental education is one of the keys to preventing the younger generation from repeating our mistakes. This book is ideal for this reason and I thank Carole Stora-Calté for her artistic contribution, endowed with a grand power of conviction.”

Jean Jouzel President of “Météo et Climat” (French meteorological society) and Vice-Chair of IPCC Working Group I, Co-laureate of the 2007 Nobel Peace Prize.

“In order to save the planet, push your parents to really do something about it.”

Ronan Dantec French Senator of Loire-Atlantique, Vice President of the commission for land settlement and sustainable development.

“Let's rise to the challenge together because, as the old OUKA Wiseman said so well, every gesture counts. Let's act and become citizens in defence of the climate.”

Nicolas Hulot Former French Minister, Founder and Honourary President of the Nicolas Hulot Foundation for Nature and Man.

“Finally, this book addresses children as well as adults since it is true that we must all understand the challenge that we face in order to act. The good news is that we are still in time and that we can win! So let's all get to work, let's all become OUKAS! “

Allain Bougrain-Dubourg President of the “Ligue pour la Protection des oiseaux” (Bird Protection League), Advisor at the French Economic, Social and Environmental Council.

“Just like the OUKAS, I also want to dream of a future full of hope for our planet.”

Alain Hubert explorer and President of the International Polar Foundation.

“Because every child is a rainbow that has the power to make the planet smile again and each parent has the responsibility of teaching them about this power.”

Thomas Dufour Forests and Climate Change expert
